

### DESCRIPTION

The VPTc10-28 input module is a combined EMI filter and voltage transient protection module with built-in reverse polarity protection. Compatible with VPT's DV and VPT series isolated DC-DC converters, the VPTc10-28 provides compliance for both ISO 7637-2 and DEF STAN 61-5 Part 6 Issue 6 input power requirements for vehicle systems. The VPTc10-28 also provides compliance for DEF STAN 61-5 Part 6 Issue 5, MIL-STD-1275, and MIL-STD-704, and reduces the reflected noise of the DC-DC converters to meet conducted emissions and conducted susceptibility requirements of DEF STAN 59-411 Part 3 Issue 1 and MIL-STD-461. A proven design heritage, no optoisolators and a rugged all metal or optional epoxy encapsulated package ensure long term reliability.

The VPTc10-28 is intended for harsh environments including severe vibration, shock and temperature cycling. Testing is to JESD22, MIL-STD-810, and MIL-STD-883.

These converters are designed and manufactured in a facility certified to ISO9001, J-STD-001 and IPC-A-610.
