VXRF5-28 SERIES

HIGH RELIABILITY COTS EMI FILTERS

Product Overview

Output: 5 A
Operation: -55 °C to 105 °C

1.0 DESCRIPTION

The VXR Series of EMI filters is the latest and most advanced offering in VPT's extensive line of high reliability COTS products. Building on a proven design heritage, the VXRF5 features low resistance, high attenuation and a wide input voltage range. When paired with a VXR Series DC-DC Converter, the VXRF5 passes specific DO-160 and MIL-STD-461 conducted EMI requirements. The VXR product family is optimized for a broad range of applications from military ground vehicles to commercial and military aircraft.

The VXR Series patent-pending epoxy-encapsulated V-SHIELD™ packaging is highly resistant to chemical, solvent and salt environments and is fully compatible with high volume manufacturing processes including wave solder, cleaning solvents, high pressure sprays and aqueous wash processes. A unique integral six-sided metalized shield improves system EMI compatibility. Dual sided conduction cooling coupled with reduced power dissipation simplifies system thermal design.

The VXR series is intended for harsh environments including severe vibration, shock and temperature cycling. Testing is to JESD22, MIL-STD-810, and MIL-STD-883.
