

### DESCRIPTION

The VPTPCM-12 is a Pre-Conditioning Module which allows VPT's DV and VPT series isolated DC-DC converters to operate over an extended input voltage range and provides compliance to both MIL-STD-704 and MIL-STD-1275 input power requirements. A wide input voltage range accommodates both nominal 12V and 28V inputs including avionics, mobile, ground systems, and other applications. A high efficiency design reduces input power requirements and eases thermal management. Low input and output ripple, fixed operating frequency, and companion EMI filters simplify system design and compliance. A proven design heritage, no optoisolators and a rugged all metal or optional epoxy encapsulated package ensure long term reliability.

The VPTPCM-12 intended for harsh environments including severe vibration, shock and temperature cycling. Testing is to JESD22, MIL-STD-810, and MIL-STD-883.

These converters are designed and manufactured in a facility certified to ISO9001, J-STD-001 and IPC-A-610.

This product may incorporate one or more of the following U.S. patents:

### FEATURES

- High Reliability at Low Cost
- Up to 120 Watts of Output Power
- Wide Input Voltage Range: 9 to 40 Volts per MIL-STD-704 and MIL-STD-1275
- Transient Operation down to 6 Volts and up to 100 Volts per MIL-STD-1275
- High Efficiency, Up to 99%
- Inrush Current Limiting
- Input Undervoltage Lockout
- Fixed Frequency
- Output Soft Start
- Wide Temperature Range, -55°C to 100°C
- Internally Conformal Coated
- Standard Six Sided Non-Hermetic Rugged Metal Package
- Optional Six Sided Rugged Epoxy Encapsulated Package with Integral Metalized EMI shield that is fully compatible with aqueous cleaning processes

### Package Notes

- Case temperature is measured on the center of the baseplate surface.
- Materials: Baseplate – aluminum, conductive conversion coating.  
Cover – Brass, nickel plated.  
Pins - copper, gold over nickel plating.
- Mounting holes are not threaded. Recommended fastener is 4-40.
- This Package is not hermetic. VPT offers a wide range of hermetic products. Please contact VPT for details if hermetic products are required.

## OPTIONAL EPOXY ENCAPSULATED PACKAGE

### Package Notes

1. Case temperature is measured on the center of the baseplate surface.
2. Materials: Body - epoxy with integral metalized EMI shield.  
Pins - copper, gold over nickel plating.
3. Mounting holes are not threaded. Recommended fastener is 4-40.
4. This package is highly resistant to chemical, solvent and salt environments and is fully compatible with high volume manufacturing processes including wave solder, cleaning solvents, high pressure sprays and aqueous wash processes.

**PACKAGE PIN DESCRIPTION**

Pin	Function	Description
1	VIN	Positive Input Voltage Connection
2	VIN	Positive Input Voltage Connection
3	INHIBIT	This is an open collector input. Logic Low = Disabled Output. Connect the inhibit pin to input common to disable the output. Unconnected, open collector or open drain = Enabled Output.
4	INCOM	Return Connection
5	INCOM	Return Connection
6	OUTCOM	Return Connection
7	CASE	Case Connection
8	INH OUT	This is an open collector output. It will activate low during a positive input voltage transient. It can be used as a status flag or connected to the Inhibit input of the downstream DC-DC converter to turn the converter off during a transient, when uninterrupted operation is not required. This connection is usually not required. This pin should be left open if not used.
9	N/C	No Connection
10	VOUT	Positive Output Voltage Connection

**100% ENVIRONMENTAL SCREENING**
